

# **SAFETY DATA SHEET**

In according 3rd revision GHS

Revision Date : 25 June 2018

# Section 1 – Identification

| Product Name   | : F1004                                                  |
|----------------|----------------------------------------------------------|
| Product Type   | : Homo Polypropylene                                     |
| Product Use    | : Extusion Process; Film, BOPP                           |
| Manufacturer   | : IRPC Public Company Limited                            |
|                | 299 Moo. 5 Sukhumvit Road, Amphur Muang, Rayong THAILAND |
| Emergency Call | : +66(0) 38802560                                        |
| Website        | : www.irpc.co.th, www.irpcmarket.com                     |
|                |                                                          |

Section 2 – Hazards Identification

Classification according to Regulation (EC) No. 1272/2008 (CLP) and GHS Classification :

This product is not classified as dangerous according to Regulation (EC) No 1272/2008 and GHS **Pictogram :** Not Applicable

Pictogram: Not Applicable

Signal Word : Not applicable

Hazard Statement :

# **Precautionary Statement :**

# Section 3 – Composition / Information on Ingredients

| Chemical Name | CAS Number | EC Number | Percent weight |
|---------------|------------|-----------|----------------|
| Polypropylene | 9003-07-0  | Polymer   | >=98           |

555/2 ศูนย์เอนเบอร์ยี่คอมเพล็กษ์ อาคาร บี เช็น 6 กนนอีกาวดีรับสิต แขวงอตุจักร เขตอตุจักร กรุงเทพ 4 10900 โกร. +66(0) 2765-7000, 66(0) 2765-7777 แพ็กษ์: +66(0) 2765-7002-5 IRPC Public Company Limited

# Section 4 – First-aid Measures

| Section 4 - First-alu M                 |                                                                                                                                                                                                        |  |  |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Skin Exposure                           | : If molten material comes in contact with the skin, cool under ice water or a running stream of water.DO NOT attempt to remove the material from the skin.Remove could result in serve tissue damage. |  |  |
| Eyes Exposure                           | : If molten material should splash into eyes, flush eyes immediately with fresh water for 15 minutes while holding the eyelid open.Remove contact lenses, if worn.Get immediate medical attention.     |  |  |
| Inhalation                              | : Move the exposed person to fresh air. If breathing is difficult, give oxygen. Get medical attention if breathing difficulties continue.                                                              |  |  |
| Ingestion                               | : Not a probable route of exposure. If person is conscious, rinse mouth with water. Do not induce vomiting unless directed to do so by a physician.                                                    |  |  |
| Section 5 – Fire-fightin                | g Measures                                                                                                                                                                                             |  |  |
| Suitable extinguishing                  | <b>gagents</b> : Dry chemicals, foam, water, carbon dioxide and halon. Avoid using direct streams of water on molten burning material.                                                                 |  |  |
| Hazards during fire-fig                 | <b>ghting</b> : Carbon monoxide, carbon dioxide, original monomer other<br>hydrocarbon oxidation products.Carbon monoxide, carbon dioxide,<br>original monomer other hydrocarbon oxidation products.   |  |  |
| Protective equipment                    | : Use a mask with universal filler.Use self-contained breathing apparatus and full protective clothing.                                                                                                |  |  |
| Section 6 – Accidental Release Measures |                                                                                                                                                                                                        |  |  |
| Personal precautions                    | : Avoid inhalation and direct contact with molten material.                                                                                                                                            |  |  |
| Environmental precau                    | itions : Discharge into the environment must be avoided.                                                                                                                                               |  |  |
| Cleanup :                               |                                                                                                                                                                                                        |  |  |
| vacuum).Place waste in a                | sing a method that minimizes dust generation (e.g., wet methods, HEPA<br>in appropriate container for disposal.Use care during clean-up to avoid exposure<br>y from broken containers.                 |  |  |
| Section 7 – Handling an                 | nd Storage                                                                                                                                                                                             |  |  |
| Handling                                | : Use with adequate ventilation.Avoid dust generation.Accumulations of dust should be removed from settling areas.                                                                                     |  |  |
| Storage conditions                      | : Store in a cool, dry, well-ventilated area or silo away from<br>sources of heat, flame and sparks.Ventilate enclosed storage<br>areas, such as trailers and railcars, before entering.               |  |  |
|                                         |                                                                                                                                                                                                        |  |  |

# Section 8 – Exposure Controls / Personal Protection

:

Personal protective equipment

## Exposure limits

| Component Name | Reference  | TWA |       | STEL |       |
|----------------|------------|-----|-------|------|-------|
| <b>F</b>       | ppm        |     | mg/m3 | ppm  | mg/m3 |
| Delumnonylone  | Canada-OEL | -   | 10    | -    | -     |
| Polypropylene  | Italy-OEL  | -   | 10    | -    | -     |

| reisonal protective equipment |                                                                                                                                                                                                                                                                                                                                                    |  |  |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| Respiratory protection        | : No special respiration protection is normally required.                                                                                                                                                                                                                                                                                          |  |  |
| Eye protection                | : Wear safety glasses with side shields, goggles or face shield.                                                                                                                                                                                                                                                                                   |  |  |
| Protective clothing           | : Gloves required when handling hot material.In case of fire, wear MSHA/NIOSH approved self-contained breathing apparatus or equivalent and full protective gear.                                                                                                                                                                                  |  |  |
| Ventilation                   | : Provide adequate ventilation when processing material at elevated temperatures.                                                                                                                                                                                                                                                                  |  |  |
| Other protective equipment    | : Ensure that eyewash stations and safety showers are proximal to the work-station location.                                                                                                                                                                                                                                                       |  |  |
| Engineering Controls          | : For molten materials: Provide mechanical ventilation; in general such<br>ventilation should be provided at compounding/ converting areas<br>and at fabricating/filling work stations where the material is<br>heated.Local exhaust ventilation should be used over and in the<br>vicinity of machinery involved in handling the molten material. |  |  |
|                               | Respiratory protection<br>Eye protection<br>Protective clothing<br>Ventilation<br>Other protective equipment                                                                                                                                                                                                                                       |  |  |

| Section 10 – Stability and Reactivity  |                                                                                                                                             |  |
|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|--|
| Stability                              | : No chemical reactivity under normal ambient and anticipated handling conditions of temperature and pressure.                              |  |
| Condition to Avoid                     | : Avoid heating above the recommended processing temperature.                                                                               |  |
| Material to Avoid                      | : May react with strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.May react with free halogens.                         |  |
| Dangerous decomposition                | <b>on</b> : Small quantities of low molecular weight hydrocarbons, carboxylic acids, carbon oxides can be formed during thermal processing. |  |
| Section 11 – Toxicological Information |                                                                                                                                             |  |

#### Acute Toxicity :

| Chemical name      | Route | Species | Acute Toxic Value  |
|--------------------|-------|---------|--------------------|
| Polypropylene Oral |       | Rat     | LD50 > 8,000 mg/kg |

# Irritating/corrosive effects

| Eye Irritation : Solid particles ma | ay cause transient irritation from mechanical abrasion. |
|-------------------------------------|---------------------------------------------------------|
|-------------------------------------|---------------------------------------------------------|

- Skin Irritation : Molten material may cause thermal burns.
- Inhalation : Process fumes may cause irritation.
- Ingestion : May cause a choking hazard if swallowed.

| Persistence and degradability                    | : This material is not expected to be readily biodegradable.                                                |  |
| Bio-accumulative potential                       | : Product is not likely to accumulate in biological organisms.                                              |  |
| Mobility in soil                                 | : No relevant studies identified.                                                                           |  |
| Other adverse effects                            | : This substance is not in Annex I of Regulation (EC) 2037/2000 on substances that deplete the ozone layer. |  |
| Section 13 – Disposal Considerations             |                                                                                                             |  |

## **Disposal methods:**

This material may be recycled if unused, or if it has not been contaminated so as to make it unsuitable for its intended use. Shelf life considerations should also be applied in making decisions of this type. Note that properties of a material may change in use, and recycling or reuse may not always be appropriate. Dispose of by: burial in a land-fill specifically licensed to accept chemical and/or pharmaceutical wastes or Incineration in a licensed apparatus (after admixture with suitable combustible material) Decontaminate empty containers. Observe all label safeguards until containers are cleaned and destroyed.
